

Show your work
to the **biggest**
names in licensing.

Reach your commercial potential with *License! Global's* Digital Portfolios

Developing your style can sometimes feel like the easy part of being an artist.

Between searching for contacts, trying to network and making those cold calls, you might spend less time in the studio than you do advertising — whether or not it gets you where you want to be.

But there are thousands of manufacturers and licensees who are looking every day for artwork, designs or characters like yours.

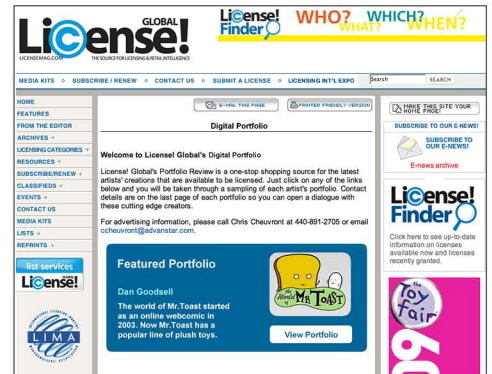

License! Global puts your work in front of them — giving you a chance to get your foot in the door — with Digital Portfolios.

Exposure you can't get anywhere else

Digital Portfolios give you access to the world's top licensees and manufacturers.

A selection of your work is featured in the Digital Gallery on the website of *License! Global*.

For all of 2009, your portfolio is exposed to companies eager to make art and design into consumer products.

Maximize the presentation of your work

As little as **\$800** for 12 months of exposure

This exciting opportunity includes full digital conversion of your portfolio into a fully interactive, online display book. Clients can view your work online, click to visit your website, and complete a lead-gen form for more information.

E-mail your clients an active-icon representation of your portfolio that they can click to view. Post the icon on your website to promote to new visitors. Receive detailed monthly tracking reports highlighting full visitor activity, including how many times your portfolio has been viewed, which images are being clicked, and more.

Give your artwork the audience it deserves with Digital Portfolios.
